

Cardin Nguyen

BACKEND DEVELOPER • CYBERSECURITY

West Linn, Oregon / (971) 517-4178 / cardin@nguyen.ink / cardin.nguyen.ink / github.com/Ne-k /
linkedin.com/in/cardin-nguyen

SUMMARY

Computer science student on a cybersecurity track with five years of hands-on software experience across competition robotics, backend services, and self-managed Linux servers. Works in Python, TypeScript, and Java, with practical exposure to penetration testing and digital forensics. Looking for a security or backend engineering internship.

TECHNICAL SKILLS

LANGUAGES	Python, TypeScript, JavaScript, Java, C++, SQL
SECURITY	Penetration testing, vulnerability assessment, digital forensics, network security, IAM
SYSTEMS & TOOLS	Linux, SSH, Docker, Git, Wireshark, Nmap, Burp Suite, VS Code, IntelliJ
FRAMEWORKS	Node.js, Next.js, React, Vite

EXPERIENCE

Undergraduate Research Assistant — OPEnS Lab, Oregon State University Corvallis, OR Sep 2026 – Present

- Contribute to Loom V4, the lab's open-source modular framework for environmental sensing hardware and firmware.
- Support the Evaporometer project, building and testing field instrumentation for evaporation measurement.

Instructor — Coding With Kids Portland, OR Aug 2025 – Sep 2026

- Taught programming fundamentals across a wide range of student skill levels, adjusting pacing each session.
- Broke complex concepts into explanations that held a young audience and still stayed technically accurate.

Videographer — IConnect007 Anaheim, CA Jan 2023 – Apr 2025

- Operated multi-camera setups and supported live switching for industry trade show coverage.
- Streamlined post-production workflows and coordinated deliverables with the production team on tight event deadlines.

Software Developer — FRC Team 7034 & FTC Team 10332 West Linn, OR May 2021 – 2025

- Wrote and maintained Java control software for competition robots across four FRC and FTC seasons.
- Built autonomous routines and driver-assist features, and supported team STEM outreach events.

AV Crew, Volunteer — FIRST Robotics Competition Portland, OR 2026 – Present

- Run live audio and video for competition events, covering setup, match transitions, and on-the-spot troubleshooting.

SELECTED PROJECTS

Rasmai — Discord bot and web dashboard for maimai DX: reads DX NET scores and ranks the charts where a realistic push gains the most rating. TypeScript, Next.js

Aurora Alerts — Alerts when aurora activity is forecast within three days, using NOAA space weather data. Python

2024 Crescendo — FRC Team 7034's competition robot code, built with the student software group. Java, WPILib

nguyen.ink — Personal portfolio, statically generated with live GitHub and Spotify data. TypeScript, Next.js, Tailwind CSS

EDUCATION

Oregon State University — B.S. Computer Science, Cybersecurity Corvallis, OR Expected 2029

Portland Community College — Computer Science & CIS coursework Portland, OR Sep 2025 – Jun 2026

West Linn High School — Graduated with Honors West Linn, OR Aug 2021 – Jun 2025
Computer Science Honor Society member
